# Tips & Tricks

***As a virtual events is a unique opportunity for you to connect with companies it is a good idea to be as prepared as you can! Here are some tips and tricks:***

## **Before the event:**

- Fill out your profile as much as possible in order to be displayed as an interesting candidate. In this way you will make sure that the matching score works properly
  - Companies can source candidates and reach out to the most interesting ones
  - Companies usually check out the profiles before accepting an interview booking. Also, when you reach out to a company your reply rate will increase with a complete profile
- Visit the event a few days or weeks before it goes live to do some research about the different companies and see their offering to ensure that you are prepared and have a relevant and efficient event
- Book interviews well in advance. With many events, you can check out stalls in advance. If you do get a rejection from an interview request, do not be discouraged - go make another request!

## **During and after the event:**

- Reach out to engage with companies
- If there is a live presentation you can engage by writing in live questions and upvote interesting questions to increase the chance of that question getting answered
- We suggest that you don't apply for jobs during the fair since this is a rather time consuming task. Instead note down some interesting jobs and find them on the platform again after the fair. Use the day to focus on conversations and gaining insights from company reps.
